

Software as a Service (SaaS)

EVS Professional Services

Better Than SaaS

Escape Velocity Systems (EVS) delivers the power of Sage MAS 500 ERP directly to your desktop with the Better Than SaaS (Software as a Service) offering. Now, your organization can operate Sage MAS 500 ERP with a simple monthly payment and no additional hardware required.

Benefits of SaaS without the Risk

Traditional SaaS can have severe limitations. When you outgrow the software or want to move systems in-house, most of the data accumulated will be lost or provided in a cryptic format. In addition, bringing the application in-house on your servers is not an option. In short, the SaaS provider holds you captive.

ADVANTAGES

- No additional hardware or servers to purchase
- Monthly payments vs. capital expenditure
- Shorter deployment time of ERP
- Software updates managed by provider
- Data is physically separated from other companies data
- Backups performed
- SAS 70 Type II compliant hosting facility
- Security of data and transactions
- You own the software license
- Upon cancellation you receive all of your data

The Better Than SaaS offering by EVS is truly a next generation service option for companies considering SaaS. Unlike traditional SaaS, if your organization chooses to install the ERP on your own servers, this can be done with absolutely no loss of data from the hosted solution. Better Than SaaS has a low cost of entry and low on-going infrastructure and maintenance costs which make this service an attractive option for those companies looking for an ERP solution without additional hardware requirements and simply paying a monthly fee.

“Nine out of ten companies plan to grow their use of software-as-a-service (SaaS) in the next year. More than one third of respondents (37%) plan to replace on-premise software with SaaS to drive down total cost of ownership (TCO).”

- Gartner Group
